

Ptychography, Tomography	MUMPS	XK.jl, Krylov.jl	OpenMP Applications
Drava Runtime Event-Driven Programming Model Real-time high-throughput data processing C, C++ and Python API	XKBlas Library Partial support for BLAS 1, 2 and 3 Task-spawning algorithms to multi-GPUs C, C++ and Julia API		XKOMP Abstraction Layer Pragma API via GOMP, KMP and libomptarget ABI Custom XKOMP ABI (functionality, performance) C++ API (no pragmas) with lambdas
XKRT Parallel Runtime System Tasks, threads, teams, NUMA awarness, workstealing, etc. Device management (initialization, memory, commands, etc.)			
Hardware Vendors APIs CUDA, HIP, Level Zero, OpenCL compatible-devices (e.g., CPU, GPU, FPGA)		CGIR Library An IR for optimizing graph of commands on multi-devices systems. Custom POD and MLIR representation. JIT with LLVM.
